

KEY FEATURES

- The integrated compaction system within the **BriteBin™ Electropak** reduces litter collection costs by up to 10 times.
- The **BriteBin™** technology operates a traffic light tracking system. This identifies when the bin requires emptying and an automated alert is generated and sent to the authorised authority.
- The integrated foot pedal creates a contactless user experience and eliminates a possible trip hazard.
- The **BriteBin™ Electropak** features a standard wheeled internal bin liner which collects the litter. A standard bin liner plastic bag can be used if required.
- This is a plug and play unit powered by a standard 220 volt 13amp socket. Designed for indoor usage.
- The PEL **BriteBin™** technology features a fire detection alert which will inform the authorised authority of any tampering with the unit, it also monitors bin usage every time the flap opens.

KEY BENEFITS

- The PEL **BriteBin™ Electropak** reduces carbon emissions which helps lower your carbon footprint.
- The **BriteBin™ Electropak** is a sealed self-contained unit that eliminates overflowing bins and costly emergency clean ups.
- All PEL machines are manufactured to meet the requirements of the ISO9001 Quality Standard and are CE Certified.
- The **BriteBin™ Electropak** features an integrated infrared sensor which takes a fill level reading every 3 seconds. This allows for the bin to be monitored in real time 24 hours a day. An automated alert system is in place to indicate any errors that may occur. E.g. The service door has been left open.
- Aside from the reduction in costs there are many benefits to the **BriteBin™ Electropak** such as its positive impact on our natural environment. It cuts down the volume of single use plastic bags required and reduces the amount of waste collections by compacting up to 10 standard bins into one.

CUSTOMISED OPTIONS AVAILABLE

There are a variety of options available when ordering your PEL **BriteBin™**.

SIZE OF UNIT

The **BriteBin™ Electropak** is available in two sizes. Depending on the volume of litter, customers have a choice of a 120 or 240 litre model.

BBE 120ltr D 615 x W 624 x H 1480
BBE 240ltr D 760 x W 695 x H 1580

LITTER OPENING

There are two options for the litter opening. A Hopper which we recommend is cleaned every 2-3 months. Or a Flap opening which is more commonly used as it does not require cleaning. (The size of the litter opening can be customised)

SERVICE DOOR LOCATION (120 litre Model)

The service door can be located at the front, back or side of the machine. This allows you to place the door where best suits the location of the bin and avoid disruption to the general public.

ADDITIONAL EXTRAS

- Bespoke Stickers
- Ashtray (integrated / external)
- Dog Litter Tray / Dog Litter Bag Dispenser
- Custom Colour*

*minimum order required

SAVE SPACE, COST & THE ENVIRONMENT by compacting ten standard bins into one

CUSTOMER REVIEW

"... All in all I couldn't be happier with the PEL BriteBins with a reduction of 8 labour hours per week it's like getting an extra days productivity for free whilst at the same time we have solved the menace of seagulls raiding our bins..."

- Capt. Brian Sheridan Harbour Master
& Pilot Superintendent Galway Harbour

PARTNER BIN AVAILABLE

The **BriteBin™ Electropak** can be accompanied by an IoT non-compacting partner bin. This partner bin comes equipped with the **BriteBin™** technology to allow for monitoring of fill levels. The service door can feature on the front or side of the partner bin.

There are many benefits to the installation of a partner bin. It is a lower cost unit and can help encourage the segregation of litter.
